Hello Phillip, good to hear from you. There was limited ground water data gathered at the Site several years ago, but not in 2012. Additional data is planned for the upcoming RI to be continued by the EPA's contractor.

Recently I was assigned to a Site in Oklahoma, and Brian Mueller has taken over the Falcon Site. I had planned a conference call with the Site Team to introduce Brian, but due to my conflicting schedule that did not materialize.

Brian and I will travel to the Site on Monday Feb. 11th in order to familiarize Brian with the Site. The inspection will probably take about 2 hours.

I will probably be involved with the Site for a few months more during the transition. I have copied Brian on this e-mail so that he can contact you concerning the planned RI.

Please call me if you have any questions or comments. Thanks.

Subject: Falcon Refinery Question

Rafael;

Hope all is well with you, I'm sure you are as busy as I am, but I have a quick question. Has there been any groundwater data collected at Falcon during 2012? Updating databases and management on site's status. I know the support documents have been approved and RI/FS is in preparation.

Take care, and thanks in advance.

Sincerely;
Phillip Winsor, PE
